

Planning

To collapse all government fundamental services into all in one.

Defining Requirements

1. Health services
2. Education services
3. Law enforcement services
4. Judicial services
5. Public transportation services
6. Social welfare services
7. Infrastructure development services
8. Tax and revenue services
9. Defence services
10. Public administration services

Designing the Product Architecture

Whole software are based on Java , C# and C++ .
but for this project we are going to use Figma / Adobe XD to
initial the prototype.

Developing the project / Coding

We are working on it.
